Registration Of Students

We have a Registration of student form in which we enroll students online, and in this form, we collect images and some certificates from the students such as photographs, CNIC, transcript, certificates etc.

Student Information

In this, we can see all the details of our student that we collected during admission, and all the certificates that we had taken will also be displayed here.

Record System Student

We can view the list of students we have enrolled here, and in this layout, we have various tools available such as edit, delete, change course. If we want to see the complete details of a specific student, we also have a "view" tool that allows us to see all the information.

Addmission Slip

This is our admission slip. Here, if a student has enrolled with us, their slip will be generated, and only those students who are enrolled with us will be displayed here.

Discipline Record

Here, we have a system where we can monitor the progress of a student studying at our institute throughout their time. Based on their course, percentage, and attendance, a discipline certificate will be generated. This certificate will function as a record of remarks.

HR Management System

In this scenario, we have an HR, who is leading various functions. They will be responsible for tasks such as creating employee records, managing attendance, processing leaves for employees, and handling the addition of public holidays. Additionally, they will oversee the operations of different departments. On the next page, there's a detailed list of all the tasks that the HR Manager oversees:

Account And Finance System

This panel belongs to our accounts department. Within this section, we have Payroll and Inventory & Billing Management. Under the Payroll section, we have the salary, Deduction and Bonus. In the Inventory & Billing Management section, we have Inventory and Billing / expense. We have the details mentioned next page of whatever is happening in this panel.
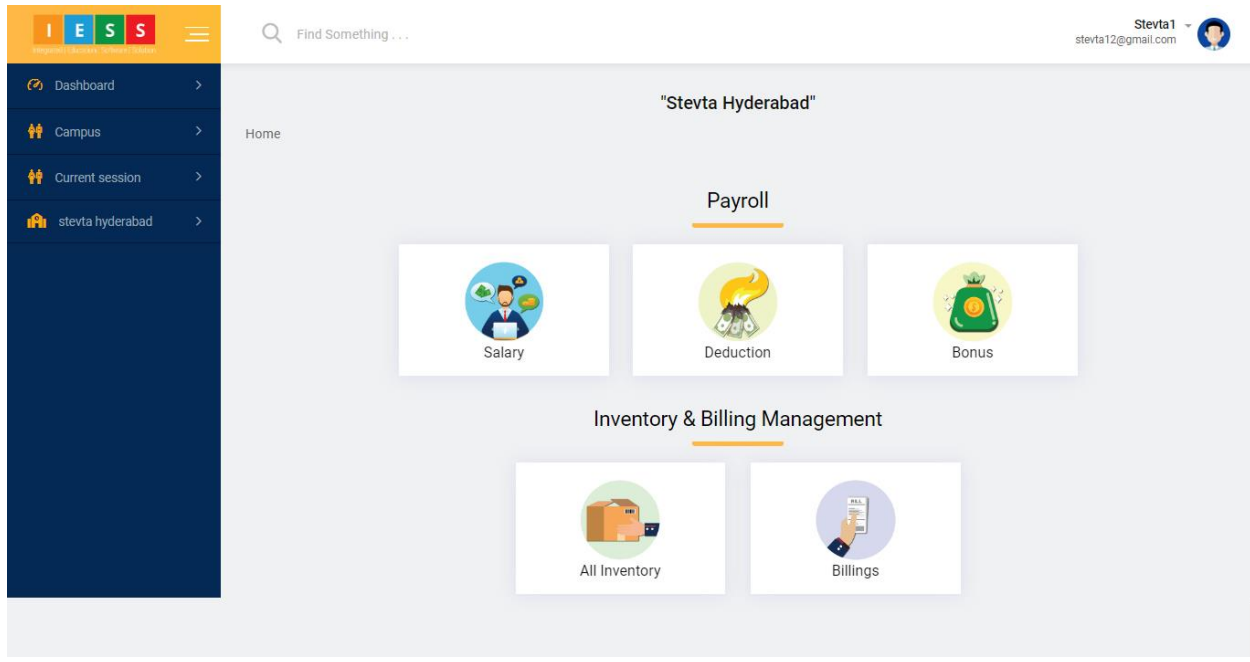

Payroll

In the payroll, we are currently processing the salaries of our employees along with handling all the deductions. After that, if we need to give a bonus to any employee, that will also be managed within the payroll system.

Inventory & Billing Management

Our role in inventory and billing management involves maintaining a detailed record of all our stocked items. We can easily add new items to the inventory and record their usage by utilizing the "Add Usage" button, conveniently present in the inventory list. Additionally, to increase the quantity of any stock item, we can use the "Add Stock" button listed within the inventory,

MCQ's Based Online Testing

In this scenario, it appears that we will be conducting online exams for students.

Fee Challan Submission

In this process, the student will pay the challan.

Cadets Personal Expenditure Record

Here, the student can effectively manage their expenditures. They can not only input their expenses but also provide descriptions to understand the reasons behind each expense. This helps them keep track of why a particular expenditure was made. Additionally. If the student considers any expense as unnecessary, they can choose to delete it from their records.

SMS (Message) Service

In this scenario, A teacher first selects the details of a student to whom they want to send a message. Conversely, students can log in to their panel, choose their respective teachers, and easily send messages. This approach ensures a smooth and efficient communication channel between both teachers and students.
